

## Coal Black Exotics

Dwight, IL

### Services to be provided

We will present a number of reptiles during our presentation, all of which are able to be handled. The goal of our presentation is education and entertainment. We tell the kids different facts about the animals and talk with them while we walk amongst them and help with petting/holding the reptiles. We typically bring 1-2 tortoises, 5-7 snakes and 3-5 lizards along with various amphibians and arachnids. Our collection has everything from a 5" salamander to a 17' python and an 85 lbs tortoise. The species that we are able to bring are mostly dependent on weather but in the summer we can bring everybody. We are very conscious of animal fears (snakes specifically) and petting/holding is not required of anyone. That being said, if anyone would like to participate in spite of their fears then we will certainly work with them. Every event usually has one or two children or adults who are a bit squeamish and that's ok. Questions and picture taking are highly encouraged during our presentation.
